Tuanku Rao Pdf 126 ebook Buku Tuanku Rao Pdf 126 PDF. Related. buku tuanku rao pdf 1. Field of the Invention The present invention relates generally to methods of monitoring flow of fluid through a pipeline. More specifically, the present invention relates to methods for detecting and monitoring changes in a fluid (including gases and liquids) flowing through a pipeline using analysis of ultrasonic signals. 2. Description of the Related Art

For various reasons, it is often desirable to measure and detect changes in a flow of a fluid or gas through a pipeline. For example, changes in a fluid flow may be used to monitor a change in the composition of the fluid, to indicate the existence of equipment breakdowns or leaks, or to track the movement of the fluid from one location to another. Further, by monitoring the fluid flow, it may be possible to make proactive adjustments, such as adjusting pumps or valves to compensate for degradation in system performance, or to reactively adjust the system based on the fluid flow data. Heretofore, fluid flow through a pipeline has been measured by determining the flow rate of the fluid, and then monitoring the change in the fluid flow over time. However, there are several drawbacks to this method of measurement. For example, it is often desirable to be able to detect and measure changes in the fluid flow through a pipeline, rather than to merely monitor the flow rate. Because of the limited amount of information provided by monitoring the flow rate alone
