From the multimedia center of Windows 7, notepad and Microsoft PowerPoint, but in the KPACS...from the KPACS GUI, without KPACS. I also have very bad text that is not possible to read. I have not tried to connect my external USB keyboard for navigation. I need to replace that, as it is not of much use, since it can not be moved around my body. I have tried that with a floppy disk and it worked, but that was not at all convenient. I have bought a new keyboard, but I have not connected it yet. I also have the problem that I have not seen the Windows 7 multilingual folder, so I do not know how to change that, if I need to change the font on my text, so it is more visible, or what... My external keyboard does not have a logo on it. But the keyboard is working when I use it to write, but not when I try to move around the text on the screen, by pressing the arrow keys. The keyboard does not work on the multimedia center, and I can not use it when I am using KPACS. And finally, why did the KPACS GUI appear and disappear. When I was using it, I entered some stuff and then it suddenly disappeared and the screen went to black. So why is it so hard to get a good software to use my scans on a handheld computer? I do not want to have a computer in my pocket, I want to have it in my hand, a hand that I can move with the keyboard. Thanks. Download K-PACS 3.1.0.2 (32-bit Windows 7) Download K-PACS is the latest version of KPACS software that is also the latest and most powerful version of KPACS software with a high speed. This version supports an internal network between two or more KPACS workstations, wherein data can be exchanged between the connected workstations. The main features of this latest version include: Interface from KPACS GUI to KPACS now features the ability to show a screenshot for files on a user's mobile PC. (Attached image is showing KPACS 3.1.0.2 GUI screenshot) Recognized human form is included as a new feature of the KPACS 3.1.0.2 version. You can use this new feature by selecting the option for recognized human form in the 2d92ce491b
