Please try to re-enter the folder location. If the issue persists, please contact the system administrator. Exception: System.IO.FileNotFoundException: Could not load file or assembly 'Evaluate, Version=1.2.1.0, Culture=neutral, PublicKeyToken=b008bf53239317d1' or one of its dependencies. The system cannot find the file specified. Exception: System.Runtime.InteropServices.COMException: Exception from HRESULT: 0x80040154 A: I found solution. The problem was in incorrect path. I replaced.html with.docx and this works fine. I will leave this question here to others who will encounter the same issue. X-ray diffraction studies of solubilized and membrane-associated cytochrome b-561 from *T. cruzi*. The haemoprotein cytochrome b-561 is present in the cell in association with the outer mitochondrial membrane and is implicated in the energy conservation in this organelle. We have used electron microscopy to locate cytochrome b-561 in membranes obtained from *T. cruzi*. The membranes were treated with salts of high ionic strength which reduced the affinity of cytochrome b-561 for the membranes. Addition of glycerol to the incubation medium enhanced the mobility of the haemoprotein and resulted in a concentration of the haemoprotein in a soluble fraction. The same procedure has been applied to the solubilization of the soluble haemoprotein. Analysis of these fractions by electron microscopy and X-ray diffraction shows that the soluble cytochrome b-561 is essentially associated with the outer mitochondrial membrane, whereas the membrane-associated form is found in close association with the inner membrane. These results are
