How to Print: Select
Print from the File menu
or the command bar in
your software. When a
cartridge has been
installed, do not remove
it from the printer and
leave.Q: (XSLT) How to
get specific string from
XML using key? I'm still

learning XSLT. I have to transform a XML that have a specific key to retrieve a string, but I don't know how to do it...

Here the XML:

22014-01-03

22014-01-03

32014-01-06

42014-01-08 Here the

XSLT I used to

transform the XML into

HTML: Desired Output:

2 2 3 4 Any idea to do it?

Thanks a lot for your
help :) A: I guess that you
just need this: XSLT 1.0
