

# [Download](#)

The screenshot shows a file listing interface. At the top, it says "File was found and ready to download!" and "UPDATED 14 HOURS AGO". Below this, it identifies the "Fastest Source: useget.nl" and includes a small instruction: "Click the download button and select one of the found cloud sources." A "Download" button with a downward arrow is visible. To the left of the button is a rating of "6.4" with five stars. Below the main content, there is a note: "You need to log in before you can post comments." At the bottom, there are three navigation icons labeled "Navigation", "Registration", and "FAQ".

Apparently Dxtory 2.0.118 does not work with the WinRAR 5.0 "Pro" package. As the 2.0.118 dxtory is listed on their site as compatible with: "WinRAR 5.00 Professional." Maybe I will try to update to WinRAR 5.5 Ultimate and see what happens. I would suggest that anyone who wants to use a DVD-Shrink (Pro) upgrade in the "near future" to use WinRAR 5.5 or higher. I am not sure how that will work out with 10.0, though I assume that it will. I have updated my PC to Win7 SP1. Not sure what that did, though. // This file was procedurally generated from the following sources: // - src/dstr-assignment/array-elem-nested-array-iter-close-lonely.case // - src/dstr-assignment/error/for-of-eval-iteration.template /\*--- description: The for...of statement should not close over Array#values when iterating over a NestedArray element.
