

Product History The first release of Deep Freeze was introduced in Windows 2000, and the first version available to non-technical users was released for Windows XP. In Windows Vista, the Deep Freeze functionality was expanded, introducing the concept of packages. Deep Freeze is also bundled with Windows 7 and Windows 8 by default. In Windows 10, Deep Freeze has been redesigned. Current version of Deep Freeze is version 8.04 (1-10-2020).
