I am building a relatively simple/abstract application using node.js (express) and am wondering what the maximum amount of RAM is that I can allocate to this. Thanks! A: There is no specific limit to express. You can set the limit of memory on express when you start your app with the following options var app = express.createServer(express.logger(), express.static__dirname + '/public'); Ask HN: What does a word mean when it's used to describe your project? - benjang I'm working on an app that helps people see their health better, and I'm interested in what people think. We're talking about word play, like that health is up or health is down. It's a small app, so a generic word like "app" or "digital" will work, but any big, generic term (like "health" or "social") might be too narrow. I'm looking for general things that people can use without needing to think about it too hard.Are there words that people often think of when they think of your project? ===== kls [
