Assessment of oxygen saturation in the periphery and in the retinal arterioles of the rat using a new fluorophotometer. An effort has been made to develop and validate a novel portable fluorophotometer for measuring blood oxygen saturation in microvessels. We have tested and evaluated the same for retinal arterioles in anesthetized rats. Indocyanine green (ICG) was used as a reference method of oxygen saturation measurement. A reduced optical pathlength of the fluorophotometer is responsible for the high 3e33713323
