KEYMACRO is a keyboard macro recorder that enables you to record every keystroke or click on the keyboard, or from the mouse, then replay them later. Keystroke recording, playback and editing KEYMACRO enables you to record every keystroke (pressed and released) on the keyboard or mouse, and all other Windows activities. You can then replay those recorded actions later. The macros can be edited and saved, and there is no limit to the number of actions you can record. For example, you can record and replay a series of keystrokes you typed, or a series of mouse clicks on a website. You can also record a whole Windows activity or a keystroke that contains several operations. The possibility to record all keystrokes, mouse clicks, windows activities and plugins is one of the most original features of this software. You can play, edit, and export the recorded actions in various formats (for example .jpeg, .mp3, .wav, .avi, .mpg and more). Perfect for professionals You can select the mode you want to use to record: - Either every keystroke, or only mouse clicks. - Or, just specific keystrokes, mouse clicks or Windows activities. - Finally, you can record everything that is happening on the screen in .jpeg, .avi or .mov format. With just a few clicks you can start recording and then forget about it. The Macros can be edited using the same options as you would use to edit text files. You can add, delete and modify text within the macros and then save them. Macros can also be saved and exported to other formats using a simple interface. Keyboard shortcuts Keystroke recording mode is extremely easy to use. To start recording every keystroke, simply click on the

Rec button in the recording window. You can also perform multiple recording sessions at once. You can stop recording by pressing the Rec button again. You can stop the recording of one session at once by pressing Alt+R. You can then edit and save your macro using the same options as you would use to edit text files. Mouse mode is also very easy to use. To start recording mouse clicks, simply double-click on the Macros button in the recording window. Windows mode, recording everything In Windows mode, KEYMACRO can record everything that is happening on your screen, such as web browser and system events. You can start recording by clicking on the 77a5ca646e
